

## **RAFFINATRICE RF 300**

Come il modello Plus la RF300 è una macchina raffinatrice robusta e semplice, dotata di cilindri in granito da 300 mm, spalle in ghisa, ingranaggi cementati, temprati e rettificati.

La sua pulizia è estremamente semplice grazie alla possibilità di smontare facilmente i raschiatori. L'apertura massima dei cilindri è di 6 mm e la loro differente velocità consente di raffinare al meglio tutti i prodotti granulati.

Le vaschette raccogli prodotto ed i carter laterali sono in acciaio inox; la tramoggia di carico è in materiale atossico ed è protetta da una griglia. I suoi 190 kg di peso indicano una macchina molto solida, concepita per durare negli anni. È dotata di ruote per facili spostamenti.

## **RF300 PLUS-GRINDER**

Indispensable in modern confectionary workshops the RF300 is a machine for refining granulated products (almonds, chocolate etc). Sturdy and simple, it is equipped with granite cylinders of 300 mm, abutments in cast iron, hardened, casehardened and rectified gears. Such characteristics guarantee a perfect functionality and a great reliability. Among the peculiarities of the machine we point out the cylinders wide maximum span up to 15 mm -that makes the machine able to grind starting from one whole piece of product- and the different cylinders speeds associated to the oscillation of the rear cylinder. The weight of 200 kg is a sign of a sturdy and long-lasting machine. The scrapers can be easily dismantled and removed.

## RF300-GRINDER

As the Plus version, the RF300 is a sturdy and simple grinder, equipped with 300 mm cylinders in granite, abutments in cast iron, hardened, casehardened and rectified gears. It is very easy to clean as the scrapers can be dismantled without any difficulties. All granulated products can be grinded at best, thanks to the 6 mm max span of the cylinders and their different speeds. The collector basin and the lateral cases are in stainless steel; the charging hopper is in non-toxic material and is protected by a grid. Its weight of 190 kg is a sign of a very sturdy and long-lasting machine. It is equipped with wheels to move it easily.
